## YOUNG PERKASIE COMPOSER SIGNS RECORD CONTRACT

Berklee College of Music graduate, Joe Moser of Perkasio, PA recently signed his first record contract with Kult Records. The electronic dance track, “So Alive,” is considered “soulful house” by some in the industry. The song was composed and produced by Moser and fellow Berklee alumnus, Joakin Eskasan, and features vocalist Craig Mitchell. The song will be released and played by major city dance club DJs worldwide.

Moser’s other accomplishments include film scoring credits on 12 films. These range from short student films to feature length films. Most recently, he was hired by Visionary Age Productions out of Fort Lauderdale, Florida as a music composer, final sound mix engineer, and lead sound editor for their epic feature film, “The 7 Swords.” He has also recently worked with fellow Pennridge graduate and filmmaker, Monica Hoge, to provide musical score for her short film “Ballun.”

Moser graduated from Berklee with a dual major in Contemporary Writing (“composing”) & Production, and Film Scoring. He arranged and conducted for a variety of college showcases, including his commencement concert. The concert was in tribute to the works of Aretha Franklin and Melissa Etheridge both of who were in attendance along with Elliot Scheiner and a number of other accomplished individuals in the contemporary music and film worlds. Moser was chosen to arrange and conduct Ms. Franklin’s song, “Since You’ve Been Gone.”

Also a graduate of Pennridge High School, Moser was very active in the district’s music program and credits much of his early musical passion and inspiration to Pennridge music directors Diane King, Kate Shaeffer, and Steve Mosser. He is an impassioned believer in not only keeping, but also expanding music in our schools. He considers music a mainstream subject that has a significant impact on student success in all areas.
